Enabling the history of medicine and public health to inform healthcare, the health sciences, and the societies in which they are embedded

One of the world's leading resources for the study of the history of health and medicine, the Center for the History of Medicine in the Countway Library attracts a global audience of researchers to its integrated collections of rare books, journals, archives, manuscripts, artifact collections, and visual, sound, and moving image works. Our public programs, exhibits, initiatives, and content curation activities are directed to a diverse audience of health professionals, students, academic researchers, and the general public and derive strength of purpose from the Harvard Medical School, Harvard School of Dental Medicine, Harvard T. H. Chan School of Public Health, Boston Medical Library, and Longwood Medical and Academic Area communities.

Visit our online digital collections site, OnView (collections.countway.harvard.edu/onview), to browse digital exhibits, documents, photographs, museum objects, and more.

Visit our blog (cms.www.countway.harvard.edu/wp) to learn about collections, events, and initiatives.
